BETTAquip Caters for the Community

Over the last few years BETTAquip has developed a niche specialist area for designing and installing commercial kitchen and servery solutions for community based projects with the most recent project being for The United Methodist Church in Clifton.

The United Methodist Church in Clifton

With the United Methodist Church project, the kitchen was installed in a new building extension and included servery catering for the refurbished church hall which now provides an excellent venue for the local community, playgroup and preschool.

The design was developed in consultation with the church committee and architect.

Jennifer Lovell from the United Methodist Church commented: *"We think that BETTAquip did an excellent job and we are very grateful for the wonderful kitchen we now have"*.

BETTAquip also supplied and installed catering equipment for the following community projects:

The High Street Centre, Rotherham. A dynamic community hub that provides great facility for meetings, activities, conferences and events, in a local setting for local people.

The Robert Parker Centre, Bloxwich. A day centre for the local community.

The Young Person Information Centre in Walsall, a local initiative to help young people by providing general advice and access to technology.

Pelsall Hall, Pelsall. A residential care home which has benefited from a major refurbishment and redevelopment. The new kitchen enabled the chefs to offer a wide choice of dishes catering for individual, personal favourites, special and medical diets.

St Mary's Centre, London. A day centre that provides access to gardens and lessons on cookery, gardening & other social skills.

The High Street Centre, Rotherham
