

Green Warewashing for National Garden Centre

A visit to a local Dobbies Garden Centre is not just about buying plants, flowers and garden products. Their garden centres offer something for everyone with demonstration gardens, children's play areas and extensive catering facilities in all of the larger sites. A family is just as likely to visit a Dobbies Garden Centre for a lunchtime meal as they are to buy something for their garden.

In line with this focus, Dobbies has invested in its catering facilities over the last number of years with a range of Electrolux foodservice equipment being installed in the kitchens. Given that Dobbies are a national chain of garden centres, it is perhaps unsurprising that the firm has a strong commitment towards the environment and being eco friendly.

BETTAquip was awarded a project to install environmentally friendly warewashing facilities at a number of Dobbies Garden Centres throughout the UK. Understanding Dobbies' attitude towards the environment and that most environmental impact occurs

during the use of a machine's lifetime; BETTAquip recommended and installed a number of Electrolux Modular Rack Type, Green & Clean Hood Type and undercounter dishwashers with the relevant Electrolux dishwasher handling system.

The Modular Rack Type warewasher range combines the highest level of washing and rinsing performance with cost saving, energy saving and environmentally friendly features. The unique wash and rinse system minimises water, energy and chemical usage to reduce overall running costs and impact on the environment. The eco friendly and cost effective functions equate to a 30% reduction in water consumption and a 75% reduction in Detergent consumption.

The Green & Clean range of dishwashers uses less water, energy, detergent & rinse aid consumption for lower running costs and less impact on the environment while providing best in class washing and rinsing performance with total detergent removal.

To discuss how BETTAquip can improve your catering facilities call 0845 22 63635 or email info@bettaquip.com. Alternatively further information can be found at the company's website www.bettaquip.com.
